### Box Office Digest Says:

HE MOST IMPORTANT NEWS of many moons to this industry is the matter-of-fact announcement by Technicolor that it will put into effect a flat reduction of one cent a foot on release prints processed after August 1st.

"There is a great industrial story of days and nights and months and years behind the manner in which Dr. Kalmus and his associates have boosted the quality and service of color to the industry, beaten down the price step by step, and maintained a great spirit of cooperation with production and exhibition.

# The DIGEST ANNUAL

### The Year of Wars

OMESTIC box office standings take on values in this year of vanished foreign markets that are tremendous in importance.

They are the only ratings that mean anything to the producer, director, player, and exhibitor.

Gone—at least for years to come—are the days when known box office failures in the American market could be pushed to fabulous income heights and foisted on the suffering American exhibitor because of a shadowy "foreign value."

Gone are the days—and we hope forever—when producers could knowingly, and with "malice aforethought," set out on the production of top budgetted pictures that would admittedly have no appeal to American mass audiences, earn no dimes for American exhibitors.

All because of that same shadowy foreign market.

So THE DIGEST ANNUAL comes to you at an opportune time.

It is the only factual record published of the DOLLARS AND CENTS earnings of picture creators at BOX OFFICES.

It is the one "poll" that is not a poll—in the sense that so many polls represent some one individual's opinion, or the opinions of many individuals of undetermined prejudices and strictly personal likes and dislikes.

It is the voice of the CUSTOMER—registered in the ballot box of theaters in every corner of the land, spoken with the voice of CASH laid on the line.

So, entering its fifth year of publication, BOX OFFICE DIGEST is proud to be the echo of that box office voice in the presentation herewith of—

BOX OFFICE ANNUAL FOR 1940.

Robert E. Welsh

### **How Percentages Are Figured**

• DURING the past four years we have constantly had many requests to explain our method of figuring percentages on pictures as they are printed in our BOX OFFICE DIGEST from week to week.

Accordingly, we are printing this page to explain in detail to our readers how the percentages are arrived at.

Below we have taken the box office receipts on one individual picture—"JESSE JAMES"—which should be explanatory to our readers.

The percentages used in our DIGEST are based on actual box office figures received from exhibitors all over the nation. Naturally, 100% is always considered the normal average. In other words, if a theater whose average is \$10,000 weekly, grosses \$7,500 on a given picture, then that picture draws a 75% rating on that particular run. On the other hand, if another picture in that same theater grosses \$15,000 it is given a 150% rating on that particular run. In the first case mentioned, the picture would be running 25% below normal, while in the second instance, the picture would be running 50% above normal

business, etc. The figures from all types of houses, both large and small, throughout the country, are then averaged out, with the per cent after the name of the picture, being the actual per cent of business, that that certain picture has played to.

In order to give our readers a more concrete example of how percentages are figured out, we are utilizing this page, to give a complete "break-down" on a given pitcure. For this example, we are using the box office figures on the 20th Century-Fox production—"JESSE JAMES," which was the biggest box office feature of 1939.

### BOX OFFICE RETURNS ON "JESSE JAMES"

In New York City, New York, this picture opened at the Roxy Theatre (average weekly gross is \$40,000). It grossed, \$68,986.00 on its first week, which is equal to  $172\frac{1}{2}\%$ —that is  $72\frac{1}{2}\%$  above normal business.

\$40,000 \frac{172\frac{1}{2}\%}{\gamma}

EDITOR'S NOTE: Where financial statements for the past fiscal year ending December 31, 1939, were not available, then the last financial state-

ment issued for a past 12 months' period, was used instead.

\*The net earnings of MGM, Paramount, Warner Brothers, and RKO, also includes 100% of the theater incomes of their agiliated circuits. 85% of the 20th Century-Fox earnings were derived from production, as that company has much smaller theater holdings; (40% of Wesco and National Theaters).

Statements furnished through courtesy of E. F. HUTTON AND COMPANY, Members of New York Stock Exchange.

### **Producer-Distributors Profits in 1939 Almost Equal to 1938**

1939 PROFITS DROP OFF \$1,500,000 FROM THE PREVIOUS YEAR

The boxes printed above clearly indicate the profits of the major Producer-Distributor Corporations over the past three year period. 1937 all of the combined film companies showed a profit of over \$37,-000,000; in 1938, the combined profits dropped off 35% to \$23,000,000, and last year, 1939, the earnings of all dropped to \$21,600,000, which is only about \$1,500,000 below the previous year.

In plain figures it is easy to see that the picture industry in 1937 was quite prosperous but took a big drop in 1938 and a slightly bigger drop in 1939. Just how 1940 will end is a matter of much discussion, but it doesn't look very healthy. The past few weeks, since the Belgian-Dutch-French invasion, has kept so many people home listening to their radios that it has seriously affected the box office receipts of our domestic theatres. The fact that the major Producer-Distributors collected approximately \$25,000,000 in foreign revenue which at this writing is practically eliminated, will just about throw every company into red ink unless production costs are cut considerably or the American theatre revenue in-

creased, which doesn't look possible at the present time.

LOEW'S, INC.: The parent company of MGM, Loew's Inc., has had a very successful 1939, grossing just a few thousand dollars below the previous year, which still leaves them the top money making company of the industry. It is estimated that approximately 50% of Loew's profit is derived from studio operation and the other 50% from theater opera-

tion. primarily the Loew's Circuit.
TWENTIETH CENTURY-FOX: Twentieth Century-Fox Pictures have taken a drop of a little over \$3,000,000 in the past year. Their profit in 1938 was slightly in excess of \$7,000,000, while in 1939 it was only a little over \$4,000,000. Sidney R. Kent, president of Fox, blames this mostly to the loss of the foreign market and bad domestic conditions. To make this up the coming year, Mr. Kent and salesmanager, Herman Wobber, are asking exhibitors to give better play-dates and longer playing time to the big box office attractions, which due to union conditions are costing the studios much more to produce.

PARAMOUNT: Paramount Pictures had a fairly good year for 1939, netting almost \$3,900,000, which is only about \$200,000 behind the previous year. However, according to inside information from the home-office, most of this profit was made through theater operation. Mr. Y. Frank Freeman, capable assistant to President Barnev Balaban, is sitting at the studio and in collaboration with William LeBaron is constantly cutting production costs and believes that he can keep the company out of red ink. It is also interesting to note that Mr. Balaban has announced that there will be no "B" pictures in the Paramount

WARNERS-FIRST NATIONAL: Warners-First National have shown the biggest profit gain in the past year of any company in the industry. In 1938 their profit was only a third of a million dollars, while in 1939 their profit is slightly in excess of two and a quarter millions. This may be due in part to the way they handle their financial write-off, particularly on heavy budgeted pictures. If Warners can continue their high production standard without increased negative costs they will probably have a prosperous 1940, if their loss isn't too heavy in the European

UNIVERSAL: Universal Pictures have made a very fine showing for the past year. In 1937 this company lost over \$1,000,000, which was cut to a half a million loss in 1938; but in 1939 the company, under Nate Blumberg's direction, has had a very successful year, going from red to black with a profit of almost a million and a half, undoubtedly much of this profit is due to Joe Pasternak for his very successful handling of Deanna Durbin and other pictures, and also in the addition of Bing Crosby to Universal's program.
COLUMBIA: Columbia Pictures have again had another bad year.

In 1937 this company showed a profit of a million and a third, which dropped to \$183,000 in 1938, and this same figure is practically repeated again in 1939. This isn't a very big profit for a company that produces so many big pictures, and furthermore, Columbia would have undoubtedly been in red ink if it wasn't for the one big Frank Capra production in 1939. With Capra out of the company, Producer Harry Cohn is

attempting to get some other big grossing pictures for this year with the addition of such prominent directors as Wesley Ruggles and Frank Lloyd.

MONOGRAM: In spite of strong competitive markets, Monogram is still continuing in its struggle for existence, and their profits for the past year seem a little better. In 1937 Monogram los tover a quarter of a million dollars, which was cut to \$180,000 loss in 1938, and in 1939 (first six months only) Monogram turned around and showed a profit of \$41,000, which isn't much to operate on, but still much better than red ink. At the time of going to press Monogram had not issued or given out their statement or the last six months of 1939, so it is hard to say whether the year ended in red or black ink for this little independent company.

RKO: RKO-Radio Pictures all through their 77-B struggle have been trying to get into the heavier black ink. In 1937, this company showed a profit of almost \$2,000,000, due mostly to the Astaire-Rogers pictures. but in 1938 their profits dropped to \$173,000 and the company would have been in red ink if it had not been for the percentage they earned for distributing Disney's "Snow White." In the past year—1939—RKO is in the red almost \$200,000.

UNITED ARTISTS: Due to the fact that United Artists is a private

corporation belonging to five members: Sam Goldwyn, Alexander Korda,

ANNUAL	RELEASES
1936	416
1937	453
1938	
	392
(Above does no (There are an average of 70 annually in	t include Westerns) Western Features produced Hollywood)

Plainly shown above are the number of major releases for the past four years, practically all of which were made in Holly-wood with the exception of a few English pictures.

It is interesting to note that last year—in 1939—there were 392 feature pictures, which is 21 more than were produced in 1938. However, over the last ten year period there was an average of 430 feature pictures produced a year (not including Westerns). So while the Hollywood studios made 21 more pictures last year over the previous year, they are still producing approximately 40 pictures less a year than they have over the past ten year period.

On account of the European war situation, and the terrific loss of foreign revenue, practically every major producer and distributor has announced that they are making from 10 to 15 pictures less for the coming 1940-41 season. So exhibitors can't look for more than around 350 pictures at most from all major distributors for the coming season. This probably means that exhibitors will have to give the bigger box office attractions extended playing time or fill in their open dates with re-issues.

### Producer-Distributor Profits for 1939

(Continued from Preceding Page)

Mary Pickford, Douglas Fairbanks and Charles Spencer Chaplin, they do not issue any financial statement for publication, but only have their own private records. However, it is estimated that this company is showing a very good profit and that the five owner-members declare themselves very good dividends from time to time. President Murray Silverstone is endeavoring to increase the usual fifteen Unitd Artists releases a year to about twenty-five or thirty, anticipating greater profits for his company and giving the exchanges something to sell from week to week.

REPUBLIC: Republic Pictures, like United Artists, is a closed corporation controlled by H. J. Yates, and this past year they have issued no financial statement so far, although it is reported that they may do so at a later date. The two previous years, 1937 and 1938, Republic showed a profit slightly in excess of a half million dollars and it's quite likely they netted about the same amount for 1939. While Republic only makes 24 regular features a year they also make a group of about 20 westerns headed by their cowboy star Gene Autry, and it is from these Westerns that a great deal of the company's profits are realized. In an attempt to bolster the company's profits, Producer Moe Siegel, has announced that Republic will make at least three big heavy budget pictures for the coming season.

GAUMONT BRITISH: Gaumont British, in the past the leading British producing and exhibiting corporation, has shown fairly good profits, particularly in 1937 and 1938. However, for 1939 this company discontinued production and is now only an exhibiting concern. Their last few releases that ran over into 1939, including re-issues, were sold through the Twentieth Century-Fox exchanges in the United States.

GRAND NATIONAL: In 1937 this company showed a loss of over half a million dollars and not having sufficient capital to operate on, went into receivership in 1938. As the studios and exchanges have since been liquidated, there is naturally no statement issued for 1939.

EDITOR'S NOTE: In the past few years we have always recorded the Western Stars on a percentage basis the same as we do other stars and pictures. However, due to the fact that Western pictures play in entirely different situations, it is hard to compare them to other major attractions in terms of percentage. Very few Western program pictures play the deluxe first-run houses or even the key city suburban run houses.

KEN MAYNARD

Accordingly we find that some of the Western series have very few bookings, and at very small film rentals which means they are not of much importance to the industry as a whole, but used more or less as a filler attraction. However, there are some very important Westerns, such as the Bill Boyd and Gene Autry series, which get several thousand bookings and play some very important houses, in the Western and Southern districts in particular.

So as noted above, to place the Western stars in their proper order we are giving the approximate gross business that each particular star series averages.

2—GENE AUTRY

3-GEORGE O'BRIEN

#### CROSS MARKS THE SPOT!

#### THE BOX OFFICE

That's where they pay in—
and pay off... At the box office
And The DIGEST is the only publication in the industry authentically
reflecting the box office and sincerely,
in its comment and reviews, striving to do
its best to help that box office... It is only
the box office that counts... and The DIGEST
is going to stick to that line... Hoping that our
effort will be awarded next year by ability to repeat
the truth that every motion picture person knows:

The MOST IMPORTANT Paper in the Industry

### "WE

### THE BOX OFFICES SPEAK!"

- ★ FIFTY-TWO weeks in the year in the cold fact records of BOX OFFICE DIGEST . . .
- ★ ONCE a year in the famous BOX OFFICE ANNUAL . . .
- ★ TWICE a year in the invaluable MID-YEAR SUMMARIES . . .
- ★ AND we talk only one language . . .
- ★ THE LANGUAGE OF CASH.
